This book discusses the main features, fundamental principles, and application areas of blockchain technology. It explains how this technology can contribute to the electricity market by enabling the implementation of new business models and new energy scenarios. The first chapter is an introductory section which covers the basic elements for framing the blockchain in the different application fields. The following chapters describe the various phases of the Italian electricity market and the players involved in each phase, the new business models and the main regulations; the features of blockchain that are useful for the energy system; and the integration of a blockchain platform for the execution of Demand Response events in an existing power grid. In the fifth chapter the results of the experimental implementation of the architecture described previously are presented, and in the final chapter the BloRin project is presented, which aims to create a blockchain-based platform for renewable energy deployment and energy exchange management. The volume targets graduate students, researchers and practitioners, and addresses the development of a new methodology for the implementation of energy services using blockchain technology, providing a guide in the blockchain area for the energy sector.

This title offers a dynamic understanding of tourism, usually defined in terms of clearly circumscribed places and temporalities, to grasp its changing spatial patterns. The first part looks at the ‘ before ’ – everyday places such as daily markets, flea markets, urban neighbourhoods, that have captured the tourists’ interest and have progressively experienced new development in their ordinary patterns. The second part investigates the ‘ after ’ – former tourist spaces moving beyond the tourism sphere and becoming places of everyday life, study or work. Chapters explore what this means for local societies and examine this contemporary phenomenon of former tourist attractions becoming ordinary and everyday, and of ordinary places beginning to take on a tourist dimension. The hybridisation of tourist practices and ordinary practices is also explored through a range of international case studies and examples written by highly regarded and interdisciplinary academics. This edited volume will be of great interest to upper-level students, academics and researchers in tourism, urban studies, and land use planning.

The Rough Guide to Italy will help you explore every corner of the country that has more UNESCO listed sites than anywhere else in the world, ranging from intriguing sights such as the cave city of Matera and the Baroque towns of the Val di Noto in the deep south, to the iconic must-sees of Rome, Florence and Venice. This friendly and easy-to-use book will guide you—effortlessly, and at just the right tempo—through the cultural, artistic, and culinary generosity of a beautiful city. —Alice Waters Nestled between the Alps and the Po River, Turin was hailed by Le Corbusier as the most beautifully situated city he'd ever seen, and by Giorgio de Chirico as the “ most profound, most enigmatic, most disquieting city not only of Italy, but of the world. ” Today Turin, an elegant city of more than a million people, with views of the Alps around every corner, is home to Italy's most vibrant contemporary art scene, as well as extraordinary architecture, sophisticated shops, and food and wine that are an epicurean's dream. A Civilized Traveller's Guide to Turin features: * detailed listings of Turin's cultural attractions, from the one-of-a-kind Museum of Cinema to the world-renowned Museo Egizio, which holds the most significant collection of Egyptian artifacts outside of Cairo * personal recommendations for hotels, restaurants, cafes, and shops * walks through the city's medieval, Baroque, and modern neighborhoods * suggestions for short trips around the region, ideas for what to do with children, and more
