Discussion. ABAP (Advanced Business Application Programming), is a fourth-generation programming language, used for development and customization purposes in the SAP software. Currently positioned along with Java, as the main language for SAP application server programming, most of the programs are executed under the control of the run-time system.

By 2001, all but the most basic functions were written in ABAP. In 1999, SAP released an object-oriented extension to ABAP called ABAP Objects, along with R/3 release 4.6. SAP's current development platform NetWeaver supports both ABAP and Java. ABAP has an abstraction between the business applications, the operating system and

~~ABAP — Wikipedia~~

ABAP syntax is almost similar to COBOL language. It was the first language that includes the concept of Logical Databases. All ABAP programs stored inside the SAP databases and executed under the control of the runtime system, which is part of the SAP kernel. In this section you can find ABAP tutorial and PDF study materials for your reference. ABAP program will look like as following image
