This authoritative edition of the complete texts of the Federalist Papers, the Articles of Confederation, the U.S. Constitution, and the Amendments to the U.S. Constitution features supporting essays in which leading scholars provide historical context and analysis. An introduction by Ian Shapiro offers an overview of the publication of the Federalist Papers and their importance. In three additional essays, John Dunn explores the composition of the Federalist Papers and the conflicting agendas of its authors; Eileen Hunt Botting explains how early advocates of women's rights, most prominently Mercy Otis Warren, Judith Sargent Murray, and Charles Brockden Brown, responded to the Federalist-Antifederalist debates; and Donald Horowitz discusses the Federalist Papers from the perspective of recent experiments with democracy and constitution-making around the world. These essays both illuminate the original texts and encourage active engagement with them.

This book has been written for a widely diversified audience--those interested in the general history of our Nation's highways and those whose interest might be more narrowly confined to matters relating to the technical aspects of highway transportation. It has been prepared in two parts--Part I deals with the broad subject of highway history from colonial days forward to the historic highway legislation of 1956; Part II deals separately and in some detail with the several areas of responsibility for administration, planning and research, design, construction and maintenance of highways and bridges, both foreign and domestic as authorized under the Federal highway legislation. The reader will note the changing reference to the name of the Federal unit assigned responsibility for the administration of the Federal-aid highway program--the original Office of Road Inquiry, the Bureau of Public Roads, the Public Roads Administration, again the Bureau of Public Roads, and finally the Federal Highway Administration. These changes in organization title are chronicled in Chapter I, Part II which covers the program administration through the years. America's Highways: History from 1776 * Part One * Chapter 1 - The Colonial Legacy * Chapter 2 - Early Turnpike Era * Chapter 3 - Early Federal Aid for Roads and Canals * Chapter 4 - The Age of Steam * Chapter 5 - The Good Roads Movement * Chapter 6 - Dawn of the Motor Age * Chapter 7 - The Beginning of Scientific Roadbuilding * Chapter 8 - The Drive for Federal Aid * Chapter 9 - Planning a Highway System * Chapter 10 - The Highway Boom * Chapter 11 - Roads for National Defense * Chapter 12 - Events Leading to Enactment of the 1956 Federal-Aid Highway Act * Part Two * Chapter 1 - Administration of the Federal-Aid Program * Chapter 2 - Finance and Economics * Chapter 3 - Planning * Chapter 4 - Research * Chapter 5 - Right-of-Way and Environment * Chapter 6 - Design * Chapter 7 - Bridges * Chapter 8 - Construction and Maintenance * Chapter 9 - Development of the Interstate Program * Chapter 10 - Construction in the Federal Domain * Chapter 11 - International Operations * Epilogue: The Success Story The economic growth of the United States in the 200 years of its existence and the record of individual prosperity achieved by its people in that brief period of time are attributable to the success of the transportation system developed during that period--a system almost totally dependent on the Nation's highways. This book has been written to record for posterity the story of highway development in the United States, beginning in the early years of the new Nation and expanding with the growing country as it moved into the undeveloped areas west of the original colonial States, and ultimately evolving into the Federal-aid highway program in which the State and Federal Governments have worked cooperatively and successfully for the past 60 years. It is a proud story and one that should be recorded. The book will make available for future highway transportation officials a documentation of earlier decisions and experiences which, up to this time, have been available only in scattered writings or in the individual knowledge and recollections of many of those involved directly in

the Federal-aid highway program during this period of development and whose experiences have not previously been recorded.

"The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"--Preface.

TRB's National Cooperative Highway Research Program (NCHRP) Report 677: Development of Levels of Service for the Interstate Highway System examines a level-of-service-based approach to describing the performance of Interstate Highway System (IHS) assets. The report also includes a template and process that state departments of transportation (DOTs) may use to implement this approach for managing their IHS assets. The appendices to NCHRP Report 677 were published on a CD-ROM that is included with the report. Titles of the appendices are as follows: Appendix A: State-of-the-Practice Research; Appendix B: Development of Levels of Service for the IHS. The CD-ROM is also available for download from TRB's website as an ISO image.
