Consider This by Karen Glass. Since I've been homeschooling a distinction has been made between Classical homeschooling and Charlotte Mason homeschooling. Whilst it was obvious the two methods shared many ideals, I think that the classical educators felt that the Charlotte Mason method lacked the rigour. Consider This by Karen Glass challenges the commonly held belief that a Charlotte Mason education is not a Classical education.

The educators of ancient Greece and Rome gave the world a vision of what education should be. The medieval and Renaissance teachers valued their insights and lofty goals. Christian educators such as Augustine, Erasmus, Milton, and Comenius drew from the teaching of Plato, Aristotle, and Quintilian those truths which they found universal and potent. Charlotte Mason developed her own philosophy of education from the riches of the past, not accidentally but purposefully. She and the other founding members of the Parents' National Educational Union in England were inspired by the classical educators of history and set out to achieve their vision in modern education. They succeeded—and thanks to Charlotte Mason's clear development of methods to realize the classical ideals, we can partake of the classical tradition as well. The classical tradition as it informs teaching is good not because it is old or “classical,” but because it works; and what works, whether old or new, is best. That's the Mason message admirably conveyed by [Karen] Glass. —David V. Hicks Classical education is an education of the heart and conscience as much as it is an education of the mind. This book explores the classical emphasis on formation of character and links Charlotte Mason's ideas to the thinkers of the past. This is not a “how to” book about education, but a “why to” book that will bring clarity to many of the ideas you already know about teaching and learning. “I thought that my fire for heart education could not be further stoked; I was mistaken. Karen Glass has here laid out the thrilling joy of education, for both the teacher and the taught.” —Michelle Miller, author of the TruthQuest History series “From the very beginning I couldn't put it down! What a gem!” —Sonya Shafer of Simply Charlotte Mason “Karen says everything I would have loved to say about education in a clear, understandable, and easy to read style. It is the missing link between what we call Classical Education and the Charlotte Mason approach.” —Cindy Rollins, contributor at The CiRCE Institute

This is Charlotte Mason as you have not seen her before: Mind to Mind is her well-seasoned final work, originally titled An Essay Towards a Philosophy of Education. Divested of outdated material, the essential philosophy is brought into sharp relief. Ms. Mason wrote, "The message for our age is, Believe in mind, and let education go straight as a bolt to the mind of the pupil." Our generation needs to hear that message more acutely than ever. Karen Glass, with deep respect for the original, has preserved the essentials in Ms. Mason's own words, while delivering the material in a format that speaks to today's readers. This book is an abridgment in the literal Latin sense of "to shorten." What has been shortened is not merely the length of the original volume, but the path between the modern reader and the mind of Charlotte Mason. In this book, Charlotte Mason presents the vital principles that underlie her methods, and with the confidence of many decades of practice behind her, recommends those methods to a wider audience. She wanted to reform and regenerate the educational practices of Great Britain in the early 20th century, but 21st century readers will find her ideas just as potent, just as penetrating, and even more refreshing than they were when they were originally penned. Her first principle is "Children are born persons": not machines, not animals, not accidental conglomerations of cells, but persons, with all the magnificent possibilities that personhood implies. The education we should offer a person is the education Charlotte Mason offers to us.

"The art of narration is the art of telling. It extends from oral traditions of ancient cultures to yesterday's headlines. We all want to tell each other things, and shared communication deepens our relationships and heightens our understanding. [...] This book will show you how to make that natural activity a vital part of education that enhances students' understanding and relationship with knowledge, while allowing them to grow into skilled communicators."--Page 4 of cover.

Charlotte Mason looked at the world and saw that it was governed by universal laws, such as the law of gravity. Then she wondered. What if there were similar laws that governed the way people learn? If we knew what those laws were, we'd be able to pursue education along the most promising lines. She devoted her life to finding the key principles of education and then developing methods to make the most of them. The result is a comprehensive picture of living and learning that breathes life into education at every level--from babyhood to the adult years. It's not a rote system, but a flexible set of ideas that keep education in focus. These principles are for everyone concerned with teaching and learning. They are no more difficult to implement than the principle of gravity which allows you to walk, run, and even--when you know what you are doing--to soar.

bestselling author of *Don't Make Me Count to Three!*, lays out a simple, Bible-based strategy for parents to help their kids tame their tongues and walk in the transforming power of Christ. Are you ever embarrassed or shocked by what comes out of your child's mouth? Do you raise your voice, threaten, and coerce, but find yourself frustrated because nothing seems to work? In *I Can't Believe You Just Said That!*, Ginger Hubbard provides a practical, three-step plan to reach beyond the behaviors of tongue-related struggles—such as lying, tattling, and whining—to address your child's heart. After all, as Matthew 12:34 tells us, “the mouth speaks what the heart is full of.”

A reissue of a classic text, *Norms and Nobility* is a provocative reappraisal of classical education that offers a workable program for contemporary school reform. David Hicks contends that the classical tradition promotes a spirit of inquiry that is concerned with the development of style and conscience, which makes it an effective and meaningful form of education. Dismissing notions that classical education is elitist and irrelevant, Hicks argues that the classical tradition can meet the needs of our increasingly technological society as well as serve as a feasible model for mass education.

The immensely popular ideas of Charlotte Mason have inspired educators for many decades.
