Started by Kara Vavrosky, RDH, Dental Hygiene Answers is a question and answer platform specifically made for Dental Hygienists. While running her Facebook page, Dental Hygiene with Kara RDH, Kara saw a need for a place where hygienists could ask their fellow hygienists questions. To provide visibility to these questions beyond Facebook, Dental Hygiene Answers was born.

Many hygienists, including myself, feel the same way about plastic instruments and their efficacy in scaling implants. I feel they do nothing! Studies have shown that plastic instruments do the least damage to the implant structure, however they also have been shown to leave a residue which can cause peri-implantitis.

(Hons) | University of ...

The correct answer is: Acid. Explanation:

Tooth decay occurs when foods containing carbohydrates (sugars and starches) are left on the teeth. Bacteria that live in the mouth digest these foods, turning them into acids. The bacteria, acid, food debris, and saliva combine to form plaque, which clings to the teeth.
