Architecture is created to response to this need for inside/outside spaces. Design of inside and outside Spaces and relation between them always has been one of necessities for definition and limitation of human living spaces, but little attention to relation of this two spatial realms and poor design of transitional spaces between them has caused to lack of quality in current Iranian architecture.

Blurring the Lines Between Inside and Out This Wimberley home was an architect ' s dream job. With nearly 6,000 square feet of house to take advantage of the 270-degree panoramic Hill Country view, architect Neel Morton, AIA, of Office of Architecture, created a striking and unusual get-away residence...

Inside Outside constructs a framework of interpretation for architecture and landscape architecture in order to disclose relations between them that are normally overlooked. Five operations--reciprocity, materiality, threshold, insertion, and infrastructure--each initiate an alternative way of looking at the construction and representation of relationships between architecture, landscape, city, and individuals. Twenty-four projects each contribute in a unique way to the definition of an operation.

Petra Blaisse and her firm, Inside Outside, specialize in the rare combination of interior and landscape design, interweaving architecture and context. Interior projects use materials that introduce visual effects such as color, flexibility, seasonal change, and movement and solve acoustic, climatic, shading, and spatial issues. Landscape projects reflect a fascination with materials, light, and movement within an urban and infrastructural program. This approach brings forth a series of strong, multilayered garden and park designs that combine logistics with rich planting schemes and graphic effects. Inside Outside introduces the full range of Blaisse ' s work, focusing on collaborations with internationally renowned architects including Rem Koolhaas and SANAA. It weaves together descriptions and documentation of more than fifty projects, a conversation with the designer, and essays by renowned writers and critics.

When we walk into a gallery, we have a fairly good idea where the building begins and ends; and inside, while observing a painting, we are equally confident in distinguishing between the painting-proper and its frame and borders. Yet, things are often more complicated. A building defines an exterior space just as much as an interior, and what we perceive to be ornamental and marginal to a given painting may in fact be central to what it represents. In this volume, a simple question is presented: instead of dichotomous separations between inside and outside, or exterior and interior, what other relationships can we think of? The first book of its kind to grapple with this question, Inside/Outside Islamic Art and Architecture focuses on a wide spectrum of mediums and topics, including painted manuscripts, objects, architectural decoration, architecture and urban planning, and photography. Bringing together scholars with diverse methodologies-who work on a geographical span stretching from India to Spain and Nigeria, and across a temporal spectrum from the thirteenth to the twenty-first century-this original book also poses engaging questions about the boundaries of the field.

Essays at the intersection of philosophy and architecture explore how we understand and inhabit space. To be outside allows one a fresh perspective on the inside. In these essays, philosopher Elizabeth Grosz explores the ways in which two disciplines that are fundamentally

outside each other—architecture and philosophy—can meet in a third space to interact free of their internal constraints. "Outside" also refers to those whose voices are not usually heard in architectural discourse but who inhabit its space—the destitute, the homeless, the sick, and the dying, as well as women and minorities. Grosz asks how we can understand space differently in order to structure and inhabit our living arrangements accordingly. Two themes run throughout the book: temporal flow and sexual specificity. Grosz argues that time, change, and emergence, traditionally viewed as outside the concerns of space, must become more integral to the processes of design and construction. She also argues against architecture's historical indifference to sexual specificity, asking what the existence of (at least) two sexes has to do with how we understand and experience space. Drawing on the work of such philosophers as Henri Bergson, Roger Caillois, Gilles Deleuze, Jacques Derrida, Luce Irigaray, and Jacques Lacan, Grosz raises abstract but nonformalistic questions about space, inhabitation, and building. All of the essays propose philosophical experiments to render space and building more mobile and dynamic.

When we walk into a gallery, we have a fairly good idea where the building begins and ends; and inside, while observing a painting, we are equally confident in distinguishing between the painting-proper and its frame and borders. Yet, things are often more complicated. A building defines an exterior space just as much as an interior, and what we perceive to be ornamental and marginal to a given painting may in fact be central to what it represents. In this volume, a simple question is presented: instead of dichotomous separations between inside and outside, or exterior and interior, what other relationships can we think of? The first book of its kind to grapple with this question, *Inside/Outside Islamic Art and Architecture* focuses on a wide spectrum of mediums and topics, including painted manuscripts, objects, architectural decoration, architecture and urban planning, and photography. Bringing together scholars with diverse methodologies—who work on a geographical span stretching from India to Spain and Nigeria, and across a temporal spectrum from the thirteenth to the twenty-first century—this original book also poses engaging questions about the boundaries of the field.

This book explores how psychoanalysis and architecture can enhance and increase the chances of mental 'containment', while also fostering exchange between inside and outside. The way in which psychoanalysts take care of mental suffering, and the way in which architects and city planners assess the environment, are grounded in a shared concern with the notion of 'dwelling'. It is a matter of fact that dwelling exists in a complex context comprised of both biological need and symbolic function. Psychoanalysis and architecture can work together in both thinking about and designing not only our homes but also the analyst's consulting rooms and, more generally, our therapy places. However, this is possible only if they renounce the current limited and restrictive model of this interaction, and propose one more that is more in harmony with the questions and situations that clients themselves pose.

Architecture and sociology have been fickle friends over the past half century: in the 1960s, architects relied on sociological data for design solutions and sociologists were courted by the most prestigious design schools to lecture and teach. Twenty years later, at the height of postmodernism, it was passe to be concerned with the sociological aspects of architecture. Currently, the rising importance of sustainability in building, not to mention an economical crisis brought on in part by a real-estate bubble, have forced architects to consider themselves in a less autonomous way, perhaps bringing the profession full circle back to a close relationship with sociology. Through all these rises and dips, Robert Gutman was a strong and steady voice for both architecture and sociology. Gutman, a sociologist by training, infiltrated

architecture's ranks in the mid-1960s and never looked back. A teacher for over four decades at Princeton's School of Architecture, Gutman wrote about architecture and taught generations of future architects, all while maintaining an "outsider" status that allowed him to see the architectural profession in an insightful, unique way.

A companion volume to *Inside the Not So Big House* explains how to create a seamless transition between indoor space and outdoor living through a consideration of the building in relation to the surrounding land and the development of a landscape design that links the inside and outside. Reprint.

From 1946 to 1973, Whitney Rowland Smith and his partner, Wayne Williams, designed more than 800 projects, from residential, commercial, and public buildings to housing tracts, multi-use complexes, and parks and master plans for cities. Working in the wake of the first generation of avant-garde architects in Southern California and riding the postwar building boom, their firm, Smith and Williams, developed a pragmatic modernism that, through remarkable planning and design, integrated landscapes with buildings and decisively shaped the modern vocabulary of architecture in Los Angeles. Through a breathtaking array of images, *Outside In* unveils the core of Smith and Williams' architectural practice. Their most influential designs, the authors show, are compositions of balanced opposites: shelter and openness, private and public, restraint and exuberance, light and shadow. Smith and Williams created spaciousness in their buildings by layering spaces and manipulating the relationship between structure and landscape. This spaciousness expressed modern ideas about the relationship of architecture to environment, of building to site, and, ultimately, of outside to in.
