This book offers a clear explanation of the principles and practiceof construction planning, programming and control during thereparation and construction stages of a project. The book iswritten in the context of current procurement and contractualarrangements and JCT2005, NEC3 and ICE7 contracts are covered. Thestatutory framework within which construction projects must be managed is explained and the topic of construction hazard and risks covered in detail. A variety of programming techniques areexplained and the development of safe construction sequences andmethods is particularly emphasised. The control of time, money andresources are considered in a risk management context and acomplete chapter is devoted to cash flow. The third edition has been extensively updated and extended toinclude new materials on: * Hazard identification * Risk assessment * Health and safety management * CDM 2007 * Construction sequences and method statements * Delay analysis * Waste management and Site Waste Management Plans The final three chapters are devoted to individual case studieswhich have been selected to illustrate the practical application ofthe principles explained in the book and to provide examples ofcurrent procedures adopted by major contractors. The content isdesigned to provide a clear and comprehensive text forundergraduates on construction management, surveying and civilengineering degree courses.
