Revelation, Rationality, Knowledge & Truth – Examines the relationships between science, philosophy and religion; Sawaney Fazl – E – Omer – Official Biography of Mirza Basheer-ud-Din Mahmood Ahmad, the second Caliph of the Ahmadiyya Muslim Community; An Elementary Study of Islam; Gulf Crisis and The New World Order

This book examines a diverse and wide range of subjects including the concept of revelation in different religions, history of philosophy, cosmology, extraterrestrial life, the future of life on earth, natural selection and its role in evolution. It also discusses the advent of the Messiah, or other universal reformers, awaited by different religions. The main emphasis is on the ability of the Quran to correctly discuss all important events of the past, present and future from the beginning of the universe to its ultimate end. Aided by strong incontrovertible logic and scientific evidence, the Quran does not shy away from the presenting itself to the scrutiny of rationality.--From back cover.

The Diamond Jubilee of Her Majesty Queen Victoria was celebrated with great pomp and show in June 1897 throughout British India. Since the purpose of the advent of the Promised Messiah(as) was to propagate the Unity of God and His message, he found a way to serve those objectives at that occasion. He published the booklet Tohfa-e-Qaisariyyah on May 25, 1897. In addition to felicitating Her Majesty, the Promised Messiah(as) made the following points with great subtlety and wisdom: 1. Truthfulness of the Holy Prophet Muhammad(sa). 2. T ruthfulness of Islam and its teachings that can bring about international peace. 3. A proposal for Her Majesty to organise a conference of great religions. 4. A strong plea for Her Majesty to clear Hazrat Isa(as) (Jesus) of the accusation of having been cursed. 5. An undertaking to show a sign of his own truthfulness, provided that Her Majesty would agree to accept his message in case of fulfilment – adding that he would accept death penalty if he is unable to show a convincing sign.

Dawkins explains and argues how the theory of evolution by natural selection refutes the creationist watchmaker theory that posits a divine creator.

NEW YORK TIMES BESTSELLER • The bestselling author of Zealot and host of Believer explores humanity ' s quest to make sense of the divine in this concise and fascinating history of our understanding of God. In Zealot, Reza Aslan replaced the staid, well-worn portrayal of Jesus of Nazareth with a startling new image of the man in all his contradictions. In his new book, Aslan takes on a subject even more immense: God, writ large. In layered prose and with thoughtful, accessible scholarship, Aslan narrates the history of religion as a remarkably cohesive attempt to understand the divine by giving it human traits and emotions. According to Aslan, this innate desire to humanize God is hardwired in our brains, making it a central feature of nearly every religious tradition. As Aslan writes, " Whether we are aware of it or not, and regardless of whether we ' re believers or not, what the vast majority of us think about when we think about God is a divine version of ourselves." But this projection is not without consequences. We bestow upon God not just all that is good in human nature—our compassion, our thirst for justice—but all that is bad in it: our greed, our bigotry, our penchant for violence. All these qualities inform our religions, cultures, and governments. More than just a history of our understanding of God, this book is an attempt to get to the root of this humanizing impulse in order to develop a more universal spirituality. Whether you believe in one God, many gods, or no god at all, God: A Human History will challenge the way you think about the divine and its role in our everyday lives. Praise for God " Timely, riveting, enlightening and necessary." —HuffPost " Tantalizing . . . Driven by [Reza] Aslan ' s grace and curiosity, God . . . helps us pan out from our troubled times, while asking us to consider a more expansive view of the divine in contemporary life." —The Seattle Times " A fascinating exploration of the interaction of our humanity and God." —Pittsburgh Post-Gazette " [Aslan ' s] slim, yet ambitious book [is] the story of how humans have created God with a capital G, and it ' s thoroughly mind-blowing." —Los Angeles Review of Books " Aslan is a born storyteller, and there is much to enjoy in this intelligent survey." —San Francisco Chronicle

Faith and reason, especially in Roman Catholic thought, are less contradictory today than ever. But does the supposed opposition even make sense to begin with? One can lose faith, but surely not because one gains in reason. Some, in fact, lose faith when reason is not able to make sense of the experiences of our lives. We very quickly realize that reason does not understand everything. Immense areas remain incomprehensible and irrational, which we abandon to belief and opinion. Soon we definitively renounce thinking what that has been excluded from the realm of the thinkable. Ideological nightmares arise from this slumber of reason. Thus, the separation between faith and reason, too quickly taken as self-evident and even natural, is born from a lack of rationality, an easy capitulatin of reason before what is supposedly unthinkable. Rather than lose faith through excessive rationality, we often lose rationality because faith is too quickly excluded from the realm that it claims to open, that of revelation. We lose reason by losing faith. Examining such topics as the role of the intellectual in the church, the rationality of faith, the infinite worth and incomprehensibility of the human, the phenomenality of the sacraments, and the phenomenological nature of miracles and of revelation more broadly, this book spans the range of Marion ' s thought on Christianity. Throughout he stresses that faith has its own rationality, structured according to the logic of the gift that calls forth a response of love and devotion through kenotic abandon.

In Ibn Taymiyya on Reason and Revelation, Carl Sharif El-Tobgui offers a comprehensive analysis of Ibn Taymiyya's ten-volume magnum opus, Dar ta ru al- aql wa-l-naql, elucidating its author's foundational reconstitution of rationality through the multifaceted ontological, epistemological, and linguistic reforms he carries out.

A fascinating, philosophical approach to the concept of divine revelation, exploring the implications this theory may have for generating a new concept of religious truth.
