The Logic of Failure is report on a series of gaming scenarios where civic and business leaders were given decision driven issues and adequate information to make good decisions. In the vast majority of cases, the leader makes a decision that is inappropriate to the time horizon of the issue.

The Logic Of Failure: Recognizing And Avoiding Error In ...

The Logic of Failure is an exploration of some of the prominent factors affecting our ability to plan and act. Factors that are at no lack to anyone, but seem to slip away through our common sense (which just means our present and available brain capacity or capabilities); factors such as temporal configurations, realizations of non-linear relationships, tendency to employ methodism, etc.

The Logic Of Failure Recognizing And Avoiding Error In ...

The Logic of Failure, by Dietrich Dorner A book review by Ian Jay Projects are about change, and frequently involve complex systems. There are time delays separating action and related effects. These are linkages which we often fail to recognize. The most recent and spectacular evidence of this failing was the accident at Chernobyl.

The Logic of Failure, by Dietrich Dorner

Yet, it is known that many decisions fail to attain their objectives, particularly in IT, where project failure can occur as high as 40-95%, depending on the definition of failure (Dalcher ...
