UHF HIGH POWER CONSTANT DTV MASK IMPEDANCE FILTER •Low Insertion Loss MCI's High Power Constant Impedance DTV Mask Filter is designed to permit the use of common amplification in UHF transmitters. The dual mode filter is used in broadcast systems where strict DTV or DVB requirements are needed.

UHF HIGH POWER CONSTANT DTV MASK IMPEDANCE FILTER
HIGH/MEDIUM POWER UHF DTV MASK FILTERS. SERIES 41700. HIGH/MEDIUM POWER UHF DTV MASK FILTERS. MCI Medium Power DTV Mask Filter in optional floor mount configuration. MCI High Power DTV Mask Filters are constructed using two waveguide hybrids; two waveguide bandpass filters and a high power load, all optimized in a constant impedance configuration. The constant impedance design protects the integrity of the transmitter spectrum by eliminating re- amplification of out of band products.

HIGH/MEDIUM POWER UHF DTV MASK FILTERS
UHF Constant Impedance Mask Filter Combiner. The ADB-CCC-301-AUMB UHF Constant Impedance Mask Filter Combiner design aims at DVB – T/T2, ISDB – T, DTV. It delivers outstanding performance in a very compact design. Furthermore, the combiner module and filter deliver excellent results. These also include a bandpass and channel combining application as well as providing mask filtering.

For the UHF DTV case, the maximum ERP is 1,000 kW. For the low-band VHF at this height, I used the maximum power allowed by the FCC rules, 10.3 kW. Channel 3 was used for the VHF DTV channel and channel 35 for the UHF DTV channel. The signal level considered adequate for DTV reception varies widely.

Many TV stations with high-band VHF analog channels are moving their DTV transmissions to those channels after analog is shut down on June 12. Some have already made the transition and found viewers that were receiving DTV on UHF previously had problems with reception on VHF channels. Fortunately, rescanning solved many complaints, but not all.

This is for DTV Channels 14-69 (470 to 860 MHz). Economy pricing coupled with exceptional performance provides an uncompromising performance antenna. It also meets the critical coverage needs of growing stations. Jampro also provides a group of horizontally polarized UHF antennas developed to handle up to 2 kW DTV (average). Alternatively, 3 kW analog (NTSC) input power is available.
